

The Creating Christ – Invoking the Idea of the New Temple of Humanity

Our humanity is given a period of reflection. What must we let go of, what are the real needs and priorities that give shape, inspiration and meaning to our lives? As companions we are conscious of the need to shape a new future. It is a moment for receptivity to higher impression that will allow that which is new and seeking expression to reveal itself to our awareness.

This is a death experience for humanity and a birth of something entirely new. We must let go attachment to form and phenomenon, to organised structures, to familiar ways of working, realising that new wine cannot fill old bottles. A new cycle is now beginning that calls forth a new idea, a new vision, the potential for creative genius within every human soul.

Old structures and modes of working may no longer be serving, it is time to move on. Our humanity, love, compassion, and willingness to serve and to support one another has prepared a fertile ground for us to reclaim our innate human ability to create anew. For this new and next unfolding step, we look toward the ideating capacity of our souls. We invite you to join with us, to respond to that which ever guides us forward, to unfold the new creative techniques that give rise to the forms that will receive and express the synthetic consciousness of the group heart.

Every era of humanity builds a new Temple. What is the new idea, the work that will build the new forms within our societies, the more fitting etheric bodies to contain the synthetic consciousness of the incarnating soul, the new wine? What are the new modes – of social (and political) organising, of a sharing economy, of a soul education – the twelve petals of a new civilization reflecting the wisdom of the soul?

An era of aspiring to an ideal is ending. A new era of group conscious creative activity in service to the One Life can now begin. It is symbolised by the Aquarian Chalice pouring forth the redemptive waters of life through the higher mind of the world server group distributing the life more abundantly. It is humanity's turn – we are Creators capable of creating new realities from ideas born of the soul.

Are you ready for the creative work of the Soul? From where ever you are we invite you to step in order for humanity to move forward.

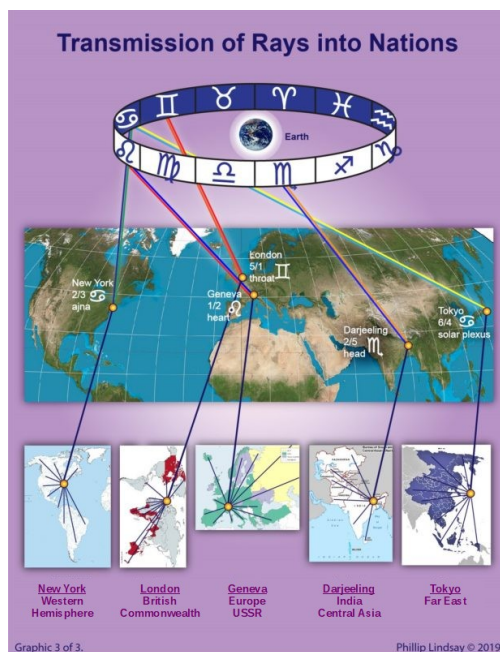

A suggested meditation follows.

The Creating Christ – A World Group Meditation

Align as soul with the world group of servers, the Planetary Ajna Centre, receptive to impression and in turn capable of fulfilling directed purpose. Move into the Ashram of Synthesis (embracing all ashramic endeavour). Identify with the Triangle of the Masters of Wisdom (M, R and DK) who guide this ashram. Visualise and align with the higher Triangle of the Planetary Logos, The Avatar of Synthesis and the Christ. Identify with Christ as the Overshadowing Soul of Humanity.

The five-pointed star is a powerful magical symbol of human evolution. It represents a perfecting Humanity. Its five points represent the Avatar, The Logos, The Christ, Hierarchy and Humanity with the centre as a sixth point of synthesis. Imagine this Star overlaid onto the five Planetary etheric Centres of distribution for the incoming energy of Synthesis relating to the Plan.

Contemplate now the Ideas of Enlightenment (Buddha) and of Unconditional Love (Christ) and how they have inspired humanity in ages past. Contemplate and receive the Soul of the New Idea, the Vision that will inspire and condition the Aquarian Era. What is that Idea – the potential for creative genius within every human soul, its synthesis of consciousness? How will it express through the departments and seed groups of a new heart centered civilization?

Visualise this Idea, its purpose, meaning and function conditioning the energy and consciousness of Synthesis (Ray 1 Will-Purpose, Ray 2 Love-Wisdom, with Ray 7 in Divine Law & Order) integrating from the highest to the lowest centres of the One Life and impressing Humanity as the incarnate consciousness of the One Life. See this energy and consciousness conditioning human life and affairs in right relationship, in harmony and renewed creativity according to the Plan. Identify with Humanity relating to and meeting the needs of every soul in every kingdom.

Extend this visualisation of a cosmic synthesis distributing throughout the etheric Light body of the Planet via the Five Planetary Inlets, in particular the Triangle of:

Ajna Centre of New York (UN), the Throat Centre of London (Humanity) and the Heart Centre of Geneva (Service to Humanity).

Hold the image of a five pointed Star of Christ forming within every human soul.

Sound the Great Invocation
